RG104 E-1 Box 121

Mint of the United States at Philadelphia,
MELTING AND REFINING DEPARTMENT,

Philadelphia, 31st May —, 1880.

Sir,

I herewith present my Reports on the melting of Bullion for Coinage during the month of April. On account of the steady daily melting of Gold, we have been obliged to blend several days workings into one delivery to the Coiner, but the general expression of wastage, ⅓ of 1000, apart from Sweep, is satisfactory.

There is much more irregularity in the Silver melting, because of the large bulks of boxes of bullion hemmed in a small space, and the consequent intermingling of portions of different days workings. Thus a whole week intervenes between the 16th and 24th, and those of the 24th were so intermingled with subsequent melts, that the last delivery of them closed on the 3rd May. By some care and eliminating

errors, I have been able to make a more satisfactory appearance, but altho' the wastage is far within the legal allowance, $\frac{2}{3}$ of a $\frac{1}{1000}$, yet it is far beyond what I hoped for. I trust that the purer spelter which we have, will show a favorable effect on the wastage account.

I am, Sir, very respectfully
yours

Sir,

I herewith present my Reports on the Melting of Bullion for Coinage during the month of April. On account of the steady daily melting of Gold, we have bene obliged to blend several days workings into one delivery to the Coiner, but the general expression of wastage 1/3 of 1/1000, apart from sweep, is satisfactory.

There is much more irregularity in the silver – melting, because of the large bulks of boxes of bullion hemmed in a small space, and the consequent intermingling of portions of different days workings. Thus a whole week intervenes between the 16th and 24th, and those of the 24th were so intermingled with subsequent melts, that the last delivery of them closed on the 3rd May. By some care and eliminating errors, I have been able to make a more satisfactory appearance, but altho' the wastage is far within the legal allowance, 2/3 of a 1/1000, yet it is far beyond what I hoped for. I trust that the purer spelter which we have, will show a favorable effect on the wastage account.

I am, sir, very respectfully yours,
